Continuation of 11. does NOT place the application in condition for allowance because: As a preliminary matter, the amendments to claims 12-14 correct a minor problem that the examiner objected to previously. As the examiner anticipated the changes no new rejections will be required.

In regards to the applicant's request that the examiner withdraw the finality of the action do to the addition of Brzakovic. As the examiner pointed out in the prior office action's Response to Arguments, the new rejections for claims 1 and 3 were provided only to deal with the new claims 12 - 16. Please see MPEP 706.07(a): "Under present practice, second or any subsequent actions on the merits shall be final, except where the examiner introduces a new ground of rejection that is neither necessitated by applicant's amendment of the claims nor based on information submitted in an information disclosure statement filed during the period set forth in 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p)." The new grounds of rejections were necessitated by the newly introduced claims.

Turing to the new argument presented with respect to claim 3. First as the evaluation functions are not clearly defined in the claim the applicant is entitled to the broadest possible interpretation of the language. Thus both Clarke and Brzakovic disclose evaluation functions for normalcy, malignancy, and benignancy as previously shown in the last rejection. The applicant is right that both references have multiple steps to determine the condition of the suspicious area. Even if what the applicant says is true in regards to the comparisons, where the first step is to determine if the area is suspicious or not this step is still a comparison between the normalcy function and the malignancy and benignancy functions, as masses are either malignant or benign.

Finally the examiner would like to note that if the applicant would like an after final allowance the applicant should incorporate the objected to material and all limitations of intervening claims into the independent claims.
